Summary

Dog-shaped embroidery floss bobbin. Make your thread look like a puppy sweater!

The cuteness you're looking for in your embroidery floss stash is here

Organise and detangle your threads with these cute companions! They're about 9 cm long, under 2 mm thick, and happy to wear your thread as a little doggie sweater with joy. The floss easily winds up on the doggie's body, while the slit between the paws holds loose ends.

Printing:

- I suggest using a textured printing plate if you have one
- avoid brim, skirt is just fine!
- no supports are needed

- I printed with 0,2 layer height, I suggest that, or even lower if you want it thinner (I don't recommend flattening the model itself, as it loses its cute features)
- PLA is perfect for this project
- use neutral colors like white, grey, or black so it's easier to judge the color of the threads
